### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1722

4. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bettencourt (6171091).

Bettencourt teaches a press mold having a shaped surface including a convex portion, and a release agent is place on the surface of the mold.

It would have been obvious for one of ordinary skill in the art to recognize Bettencourt only has convex surfaces and that the release agent is the claimed release treatment that would be placed upon the surface. The dimples of the surface being the fine structure on a substrate.

5. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ongena (4668460).

Ongena teaches the mold (10) having the press dies (12, 14), a coating that can include a release agent (Col. 4, line 66) and the having a convex surface (16) in the pressing surface.

It would have been obvious for one of ordinary skill in the art to modify Ongena with applying the release agent only on the convex side if it is desired by the user as an intended use.

6. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Miyakawa (2002/0064575).

Miyakawa teaches a mold having a convex side (10) with a release agent [0046] that can be used.

Art Unit: 1722

It would have been obvious for one of ordinary skill in the art to modify Miyakawa with the application of the release agent only on the convex side, Miyakawa teaches the use of the release agent and the application of the agent on a particular side is a preference in which the direction the user prefers the product to be released from the mold.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nelson (6385997).
